Short game, but funny. I'd like the devs to had some achievements and trading cards.... Meh... It's simple. Something I'd let my nephew or niece play when they're over. Only recommended if you got kids.. Graphics are pretty, but this is a blatant mobile game clone and should stay on google play.. Took me about 20 minutes to figure out how not to crash your car into every hill there is. Too bad this game is only 20 minutes long.

Short but funny, well soundeffects and good if you wait for your friend who just wants to finish his "speed" run.. Sunny Hillride is a sick joke.

It is an abomination upon the face of humanity.

Does shoving broken glass up your urethra sound like a good time to you? Does it?

Come on.

I spent 31 minutes playing this games story mode and I felt devastated to find that there was one.

If you are a fan of Bad Rats, \u2665\u2665\u2665\u2665 you, you will probably like this game.

Also if you like paying money for games that are free on your phone, or that you can find a better version of back in 2002 on albinoblackshepp, then have fun!

No but seriously for 39 cents it was alright.. This game has been out for over 1 year and hasnt recieved 1 update the game needs a lot of work. Shouldn't complain to much about this little gem. Its just a little casual game to pass the time, and the price is perfect. Needs a few tweeks here and there but nothing major. Gotta get that controller support in the game(Which would be way better than the mouse) and add some more levels (DLC). Kinda has that retro 50's theme going.I like that. The music is cute and i love the sound effects. Especially the kids screaming while going up and down the hills and pulling off stunts. Haha Its a yes for me!! :). <http://www.andreasilliger.com/>

This game is hilarious and a lot of fun! I definitely recommend it especially playing with some buds.. I get that it must be an alpha or beta, but its still not worth 2 dollars because its lacking features that would be good like a shop or something to use the coins.. no way in hell its worth the price very basic repetitive and unimaginative almost no controls its just limited and pointless i felot there was no clear win or lose and the graphics style wasnt very good. Great Game !!!!!!!!!!!!!!!!!!!!!!! It hurts me to downgrade this game. You need to drive between hills and grab coins. I like it. Its simple, fun and pleases me. The bad news is....the game simply breaks and closes after a while playing. Everytime.. 1 button game but meh, definetly not bad.. Played trough the bad unity mobile port in ~30 min and the screaming was annoying as hell. I bought it for 0,89€ and it's not worth it. -10/10

They where to lazy to convert the ingame achievements to work with steam.

Quick cash grab for the Devs.. 10/10 would drive again. First off I want to cover the graphics, very visually appealing to my eyes. The game is vibrant and colorful. The environmental levels hit a soft spot with me, the creators were not lazy just to have one level. I also found this game extremely addictive and I spend countless hours a day on this game.

There are some downsides however, there are only two different languages to choose from (English and German) and if this game wants a chance at going international I would expect them to make this change immediatly. There also seems to be some problems with the landing, sometimes I would lose my luggage when I landed fine.

The sound is also was a small issue for me. It was too loud and I had to manually go to my sound mixer and turn it down. The music was very enjoyable and the only option was to turn it completely off.

In conclusion there needs to be more options in the menu and more languages added and if so this could easily be one of the top games of the year.
